Formic acid in methanol nmr

A Journal of the Gesellschaft Deutscher Chemiker

Angewandte Chemie

International Edition

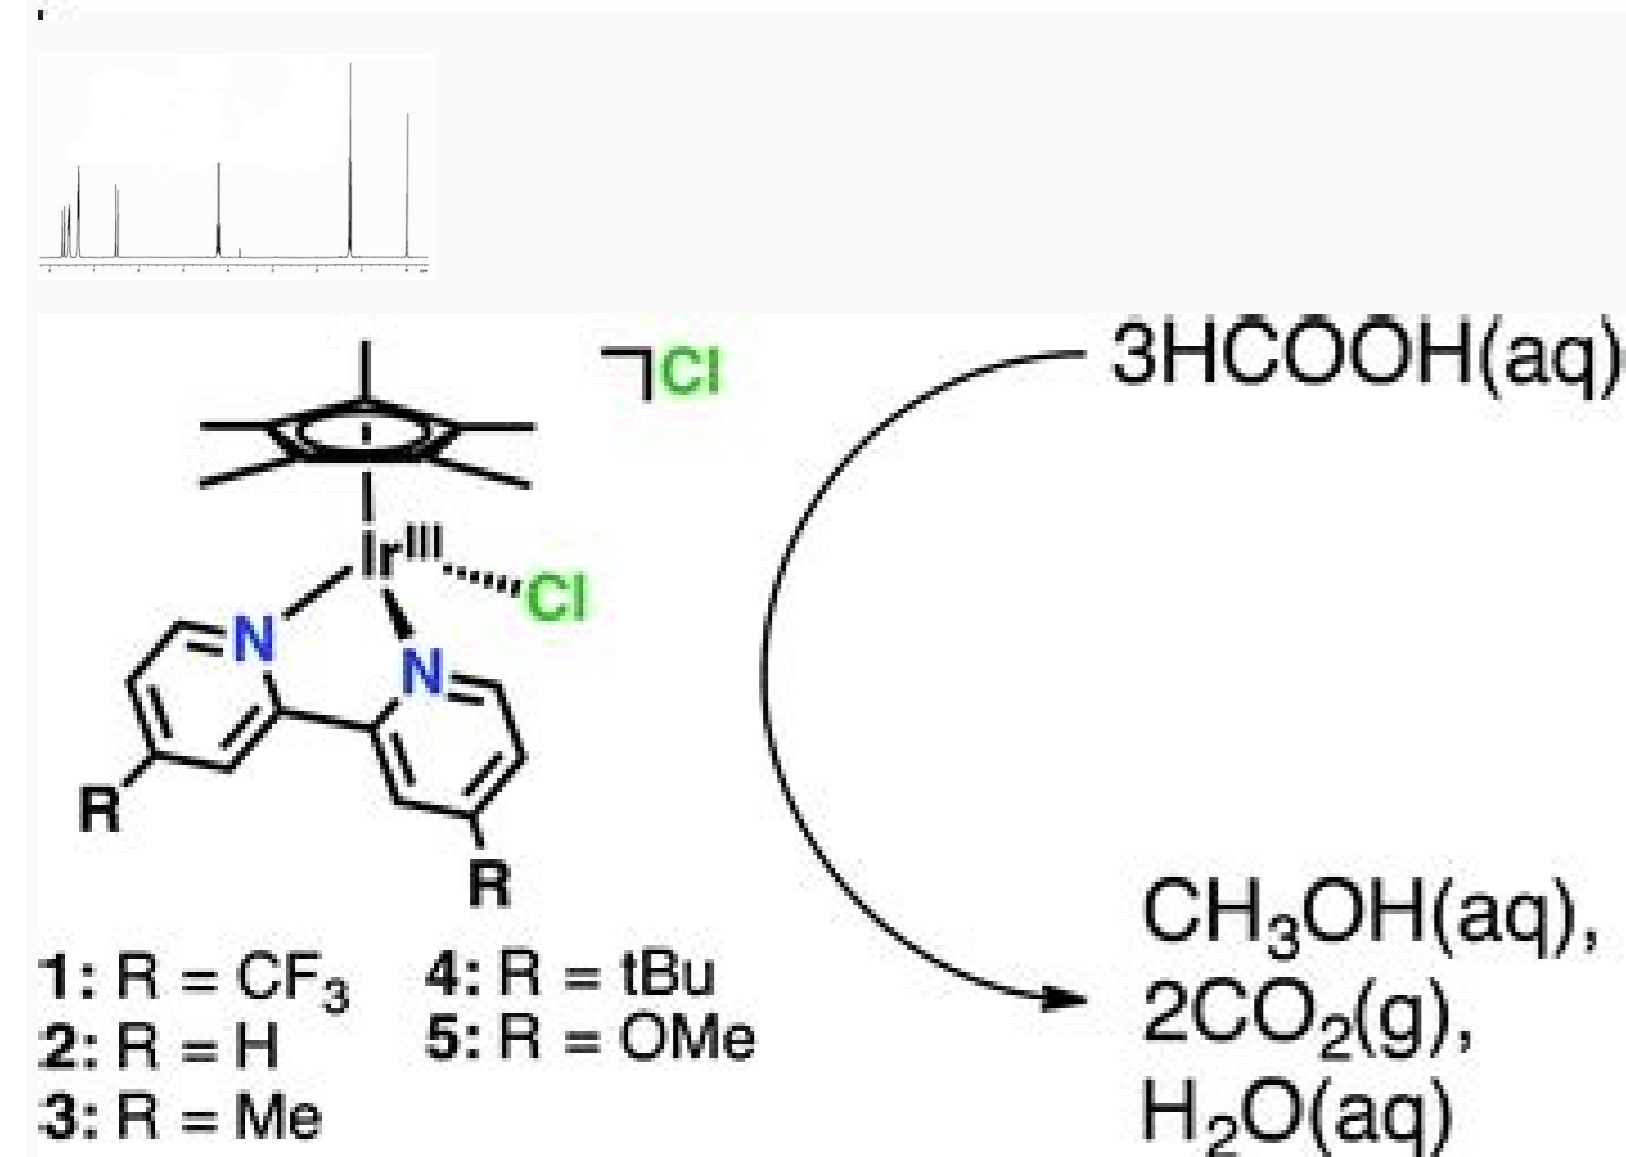

www.angewandte.org

2018-57/8

Methane oxygenation ...

... by O_2 occurred in a two-phase system comprising perfluorohexane and water under ambient conditions. In their Communication on page 2126 H., K. Okubo and K. Hirose show that the chlorine dioxide radical (ClO_2^\bullet) acts as an efficient oxidizing agent in the aerobic oxygenation of methane to methanol and formic acid under photoirradiation. The yields of methanol and formic acid were 14% and 80%, respectively.

WILEY-VCH

Is methanol a molecular compound. Is methanol acidic. What are the chemical properties of methanol.
